

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A display strip for allowing a plurality of product-enclosed bags to be attached thereto for the purpose of arrangement and display,  
which at least comprises a substrate layer containing a woven fabric and a sealant layer having heat-sealability, a punch hole being formed at an upper portion for hanging;  
wherein the woven fabric comprises a warp yarn and a weft yarn and is configured so that the weft yarn is able to move relative to the warp yarn in an intersection between the warp and weft yarns in a punch hole portion when an impact load is applied for detaching a bag from the display strip.
2. (Previously Presented) The display strip according to claim 1, wherein the substrate layer is a laminate of the woven fabric and a resin film.
3. (Previously Presented) The display strip according to claim 2, wherein the substrate layer is a laminate having a structure with the woven fabric sandwiched between two resin films.
4. (Cancelled)
5. (Previously Presented) The display strip according to claim 1, wherein the substrate layer is a laminate with the woven fabric and paper laminated via a resin layer or an adhesive.
6. (Previously Presented) The display strip according to claim 5, wherein the resin layer comprises polyolefin.
7. (Previously Presented) The display strip according to claim 1, wherein the woven fabric comprises polyolefin yarn.
8. (Previously Presented) The display strip according to claim 7, wherein the polyolefin yarn is monofilament yarn, multifilament yarn, flat yarn or split yarn.

9. (Previously Presented) The display strip according to claim 1, wherein the woven fabric comprises warp yarn and weft yarn having fineness thicker than that of the warp yarn.

10. (Previously Presented) The display strip according to claim 9, wherein the warp yarn comprises flat yarn or split yarn and the weft yarn comprises monofilament yarn or multifilament yarn in the woven fabric.

11. (Previously Presented) The display strip according to claim 1, wherein the sealant layer comprises a low melting point resin.

12. (Previously Presented) The display strip according to claim 1, which has an intermediate layer comprising a resin between the substrate layer and the sealant layer.

13. (Previously Presented) The display strip according to claim 12, wherein the intermediate layer comprises polyolefin.

14. (Previously Presented) Package assembly, which comprises the display strip according to claim 1, 2, 3, 5, 6, 7, 8, 9, 10, 11, 12 or 13 and a product-enclosed bag, the display strip and the product-enclosed bag being bonded by heat sealing.

15. (New) The display strip according to claim 1, wherein the weft yarn has a substantially flat cross section and the warp yarn has a substantially round cross section.
